

# mold control<sup>®</sup>

a revolutionary weapon  
in the battle against mold

**Recommended dosage:**  
Use 1 gallon for every 400 sq. feet

- > 2-in-1 solution kills and prevents mold
- > Eliminates musty odours
- > Contains no bleach, ammonia or VOCs
- > Health Canada registered
- > Odourless and biodegradable

## unmatched efficacy and safety

### Efficacy

- > Concrobium is unlike other DIN registered fungicides because it works by physically encapsulating fungi and fungal spores, inactivating and killing them as the solution dries
- > In addition, once Concrobium has dried on surface, it forms an invisible, antimicrobial shield that continually denies microbe attachment and prevents new mold growth

### Safety

- > Concrobium is 100% natural and is comprised entirely of FDA-approved food additives
- > Concrobium contains no ammonia, chlorine, alcohol or VOCs and has no harmful off-gassing
- > Concrobium is classified as 'Category IV' (lowest toxicity rating) by the EPA and poses no health risks to users or to occupants
- > Concrobium requires no special handling instructions or safety equipment and is ready-to-use
- > Concrobium is 100% biodegradable with no special disposal requirements

also available in 18.9L pail format

DIN registered with Health Canada  
as a Fungicide/Fungistat.

# concrobium mold control<sup>®</sup>

## IDEAL FOR

- > **Mold remediation in homes, businesses or institutions**
- > **Mold prevention following flooding or water damage cleanup**
- > **Pre-treatment of building materials for mold resistance**

## ease of use

Concrobium Mold Control offers cleaning, remediation and prevention in a single, easy-to-use product. The solution is ideal for professionals and do-it-yourselfers.

- > Concrobium can be used on virtually any hard or fabric surface
- > Concrobium leaves no harmful residue that may pose risks to children or pets
- > Concrobium is odourless and does not contain any irritating fragrances
- > Concrobium can be applied using a standard industrial fogger, facilitating treatment of large or inaccessible areas

## concrobium at work

Concrobium can be used throughout a mold remediation or water damage restoration job to ensure successful abatement and long-term prevention:

- > As an initial step, apply Concrobium Mold Control to the affected area to encapsulate and kill any existing mold and to prevent further contamination
- > Allow to dry completely and then use Concrobium to clean any remaining stains or residue as required
- > Fog Concrobium into inaccessible areas where mold is found or suspected, including ductwork and wall cavities
- > After the site has been cleaned and refinished, apply Concrobium throughout the treated area to leave an additional level of protection against mold growth
