

THE HOLE SOLUTION

Features & Benefits

- Designed to meet OSHA safety regulations 1926.502(i) for providing hole protection on construction sites.
- Safety factor > 4 for a 150 psf load, and a safety factor > 2 for a 250 pound load at the centre.
- Designed to work within a temperature range of - 20°F to 120°F.
- Creates a waterproof seal to prevent the migration of standing water. It is not designed to withstand water pressure.
- Storage: between 32° to 90° F and out of direct sun light.

Available Sizes

- 2.0, 2.5, 3.0, 3.5, 4.0, 4.5, 5.0, 5.5, 6.0, 7.0, 8.0, 9.0 inch; with larger sizes available upon request.
- Sized to fill cored holes in standard diameters listed above and their metric equivalents.

Installation & Removal Instructions

Installing The Hole Solution

- Place **The Hole Solution** over the hole of corresponding size and press firmly into place. Ensure that enough pressure has been used so that the entire cover sits flush to the slab, creating a water-tight seal.

Removing The Hole Solution

- **The Hole Solution** can be pried up with a flat-head screwdriver using the two side slots.
- During removal the seal will likely remain in the hole. Remove and discard.
- The cover may be re-cycled.
