

Why use pr 88?

- pr 88 protects the skin from oil, grease, petroleum based solvents, epoxies, adhesives, fiberglass, latex and alkyd paints, and other pollutants.
- pr 88 forms a dry elastic film that is strong and will not crease, smear, or leave a residue once it dries.
- pr 88 is cost effective, one 1L container will last about 4-5 months per person.
- pr 88 is non-corrosive, and does not contain silicon
- pr 88 is environmentally friendly and 90% biodegradable.

What are the benefits

- Skin feels healthy and safe.
- pr 88 improves the user's feeling of well being by promoting well groomed hands and skin, even after dirty work.
- pr 88 reduces the need for soaps and often dangerous cleaning solvents by 50–70%.
- pr 88 minimizes the number of gloves used, thus lowering disposable waste and saving money.
- Will not set off allergies.
- pr 88 contributes to less pollution in our water system.
- pr88 provides the user with no obstructions to natural touch and dexterity.

Economic Impact of pr 88

- Disposable gloves cost between \$25 and \$50 per person per month.
- pr 88 costs approximately \$6.50 per person per month.
- Water usage when cleaning hands is reduced by up to 90%. This greatly reduces monthly water costs.
- Less time is required for the cleanup stage leaving more time for productivity.

Ecological Impact of pr 88

- Soaps and harsh cleaners are not over used and washed down the drain.
- Waste water is greatly reduced. Perfect for tasks that require purification of waste water due to toxic materials.
- pr 88 is 90% biodegradable, which can have a great impact on corporate green initiatives and any environmental certifications (e.g. ISO).
