

# **WORX® WATERLESS HAND CLEANER**

## **NO WATER? NO PROBLEM!**

### **FEATURES AND USES:**

- Easily removes industrial grease and grime, fresh paint, carbon, brake dust, soot, wood stains, primers, pine tar, etc.
- Removes strong odors such as skunk, fish, onion, garlic, gas, diesel, and human scent
- Cleans deeply into pores without breaking the skin's surface
- Will maintain soft, smooth and healthy skin even after multiple washes

### **WORX WATERLESS DOES NOT CONTAIN:**

- Chlorinated solvents, borax, pumice, soaps, sand, or phosphates
- Ozone depleting compounds
- D or E series Butyl Glycol ethers
- Fluorocarbons
- d-limonene (or other skin sensitizing solvents)
- Phenol compounds

### **NO COMPROMISE IN:**

- Cleaning Power
- Cost
- Convenience

No water? No problem! All you need to do is put a small amount – roughly one centimeter in diameter, or about the size of a dime – of WORX Premium Waterless on your hands, rub vigorously and wipe clean with a cloth or paper towel. WORX Waterless is the result of our commitment to develop effective, economical, and safe products. WORX Waterless easily removes dirt, grease, and grime from hands without the aid of water, yet leaves them clean and soft.

WORX Waterless is a non-abrasive, non-caustic hand cleaner with built in skin conditioners; therefore, eliminating the need for the use of any additional skin care product. Formulated to match the pH balance of human skin, WORX Waterless leaves the natural oils of the skin intact. As a result, it prevents hands from becoming dry and cracked.

WORX Waterless does not contain any solvents, borax, pumice, soaps, sands, plastics or phosphates, making it safe to use, as well as highly effective. One 6 fl. oz tube will yield between 250 and 300 washes.

*A SIMPLE WAY TO STAY HEALTHY – WASH YOUR HANDS.*

## NEW DISPENSER KIT

In response to the demand from many of WORX's customers for a dispenser for the 1 lb. bottle of All-Natural Hand Cleaner, WORX is pleased to announce the introduction of a new dispenser that holds up to one pound of the All-Natural Hand Cleaner. One pound of this industrial hand and body cleaner is equivalent to 1.5 gallons of a solvent-based liquid product.

WORX's new practical and easy-to-install dispenser can be refilled without removing the dispenser from its installed location.

WORX has packaged the one pound dispenser in a kit with one 6.5 oz bottle of the All-Natural Hand Cleaner, giving customers the convenience of having a smaller, portable bottle of the All-Natural Hand Cleaner to try with the dispenser
